Council Wants Change in The Recovery Act

Pass Motion To Be Sent To Legislature

Council met in regular session last Monday with Mayo Cox in the chair and councilors Randall, B. Byde, Moore and Newham present.

Mr. Coatic waited on council and asked to rent another house as the town had sold the one in which he was living. The matter was left in abeyance for investigation, with assurance that he would be provided with a house.

Accounts as passed by the finance committee were approved for payment.

A letter was read from the Provincial Relief Board asking council to submit schedule of what council considered was reasonable and appropriate rate per month for unemployment relief in town. This was in answer to a letter from council asking the committee that the rate be increased. The matter was referred to the finance committee of council to prepare a schedule and submit a memo at next meeting.

The Municipal Inspector wrote council stating that the department would consider Harvey Morrison as auditor of the town to do any notice of change was given by the Municipal Commission.

Mr. Coatic wrote asking council to repair roof on his house. Councilors Byrdie and Moore and Mr. Kitchen were appointed a committee to investigate.

A bylaw was passed setting hours for entering gardens: "not later, say, via from 7:10 a.m. and 6 to 9 p.m."

A letter was read from the finance committee of the King's Jubilee celebration asking support of council for the celebration. On motion of council, a sum of \$2.50 for this fund. The Mayor bylaw as revised by the town solicitor was read several readings and adopted.

Mr. F. H. Brighton was appointed building inspector for 1935.

The following resolution was moved by councilor Rindvick and seconded by councilor Moore:

"That we, the council of Redcliff, approve of writing all letters to their actual levies, minus penalties and give every individual the privilege to appeal his own tax that he will be able to pay from 1 to 10 years without interest, provided they pay current taxes for the year and be allowed to be a member. The secretary was instructed to forward a copy of this resolution to Mr. Long M. L. A. requesting him to bring the matter before the future session."

Special Easter service was held in the local church last Sunday and all were well at the Red St. Ambrose had a very quiet and still. The number of members was back to normal at the morning service and the largest in the history of the church.

Adjustment Act is Big Help to Farmers

Over 40,000 Farmers Appealed To Govt. for Benefits

The Farmers' Creditors Arrangement Act has been in operation for a comparatively short time. The number of settlements effected between the farmer and his creditor is the strongest argument that could be used not only for the legislation but for the purpose of convincing everyone as to that element of fairness and honesty which characterizes debtor and creditor alike in this country.

To date there have been 4,200 settlements effected as to the end of last March 40,616 farmers applied to the Bennett government for the benefits of the Act, the largest number of applicants being from the province of Quebec. Saskatchewan, Alberta, Ontario, Manitoba, Prince Edward Island, British Columbia, New Brunswick and Nova Scotia followed respectively.

However, Prince Edward Island saw more settlements than Nova Scotia and New Brunswick combined.

There is no doubt that the piece of government legislation is working admirably. The purpose of this act is not to abolish all farm debts, a task which is impossible. What it does aim to do, and is doing, is to help farmers adjust their debts to the actual value of their property, to work out reasonable settlements. In all cases, its purpose is to keep farmers on their lands, to give them a fresh start, to bring what they owe within possibilities of payment.

Sunrise Service Easter Morning

A very beautiful and impressive service was held at 4:45 "Easter Morning" when between 40 and 50 teen age girls gathered on the hill side to watch the sunrise. Silence reigned until the sun had risen. Miss P. Buchholz had charge of the service. Suitable hymns were sung. Two poems were recited "Easter" by Evelyn Rindvick and "Easter Gifts" recited in parts by Flora Stratton, Roberta Shaw and May Martin.

Kathleen Stratton read the Easter morning story as told in the Gospel of St. John.

A story "A Little Child said I am" was told by Miss Emma Frey.

Frances Buchholz gave a very short talk on "Easter". The service closed with prayer.

The girls then gathered around a camp fire and enjoyed an early breakfast.

Young people of St. Ambrose were hosts at a pleasant evening in the Parish hall last Monday evening. Cards were presented to Mr. L. Henderson for bridge and to Mr. Jim Skidmore for whist. Miss Kate Waters and Mr. L. Mosell-John carried off the consolation. Dancing followed during which there was a novelty dance which was won by Mr. J. Caruso and Miss P. Moore.

A Splendid Entertainment by St. Ambrose W.A.

Was Given in Little Theatre Last Evening

Another demonstration of the splendid stage talent we have in town was given last evening when the Three-Act comedy "Yimmie Yonson's Yob" was put on in the Little Theatre under the auspices of St. Ambrose W.A.

While it had a moral as to the relationship which should exist between father and son and the assurance that it did not pay to be a crook, the play was full of comic and amusing incidents throughout, which kept the audience on the quiver during the entire performance.

So well did each character portray his and her part, that it would be almost impossible to single out any one for special mention. Those taking part were: W. Balmer, G. Kilgus, E. Fairhurst, W. Pickering, H. Leppard, Mrs. H. Tanner, Mrs. Shaw, Margaret Johnson, Mrs. J. Jones, Mrs. W. King.

An added attraction to the program was the recital of "Last Post" which was presented at the last Little Theatre entertainment. This was exceptionally well staged, something it was a little improved on the first appearance of this impressive play. Those taking part were O. Wooding, K. Kitchen, B. Thacker, S. Allison, H. Leppard and Orpha Reaser.

On the whole the entertainment was one of the best of the season.

Prize were given out during the evening to the lucky ticket holders, these were: Miss Isabel Cox, Fred Jones, Mrs. J. H. H. Miss Annie Shaw, O. Wooding, M. Shaw, Mrs. Sanderson.

H. J. Sisson, Manager of the mixed brick plant, here was elected chairman of the Alberta branch of the Canadian Manufacturer's Association, at the annual branch meeting held in Calgary last Monday. R. S. Sisson, Manager of the Dominion Glass plant was elected on the executive, and G. G. Buchholz of the Gunderson Brick & Coal Co. on the membership committee.

Beauties With Their Beasts

Just another beauty and the best picture, but the beauties are overshadowed by the beauties in this display of feminine and masculine beauty. The girls from three nations, Canada, the United States and Great Britain, and the handsome elephants were acquired by them during a visit to Calgary. They are bringing them home in their baggage—pandas, ox, trunks, but that won't be until their next visit to the Canadian Pacific Hotel Empress of Britain in May. The picture was made on the boardwalk of the Exposition of Britain at Columbia.

High School Standing Easter Examinations

Honors—1. Kaja Madson, 2. Zelds Balmforth, 3. Carl Sellhorn, 4. Evelyn Rindvick, 5. Annie Schmidt, 6. Geo. Ballantyne.

Passed—7. Robert Buchholz, 8. Jessie Stratton, 9. Douglas Lemming, 10. Ralph Hargrave, 11. Reggie Ross, 12. Alice Buchholz, 13. Elba Hope, 14. Curtiss Buchholz, 15. Gordon Newnam, 16. Jack Byrdie, 17. Doris Wyatt, 18. David Peterson, 19. Janet McIndon, 20. Jean Peterson, 21. Elmer Connam, 22. L. H. Leppard, 23. Effie Stratton, 24. Phillis Sheldon, 25. Elsie Black, 26. Robert Pow, 27. Helmer Kaldestad, 28. Leslie Leppard, 29. John Balmer, 30. Emma Todasta, 31. Susan Skidmore, 32. Sarah Davies, 33. Edd J. Jones, 34. Ruth Pow, 35. T. H. Ward, 36. Sam Fulton, 37. Annie Bolton.

Failed—38. Edith Colford, 39. Keith Ellis, 40. Mary Loughton, 41. Jack Leppard, 42. Jim Brown, 43. Mary Further, 44. Eva Ellis, 45. Margaret Rutherford.

Canada's Trade is Greatly Increased

Value of Exports Now Much Larger Than Imports

A concrete indication of the general upturn in Canada's trade with foreign countries is contained in a review issued by the Department of Trade and Commerce by authority of Hon. R. B. Hanson, minister of that department.

From total value of \$924,996,000 in 1933, Canada's trade figure jumped in 1934 to \$1,173,372,000 an increase of \$247,376,000 or 24.9 per cent. This value of exports in 1933 was \$136,570,000 greater than imports, while in 1934, Canada's exports were \$146,434,000 more than she bought.

Total trade of Canada with the United Kingdom during the year 1934 amounted to \$384,630,000 compared with \$309,193,000 in the previous year.

Mr. H. J. Ward, of Bedford, is at present visiting his brother Dr. Ward and Mrs. Ward.

Calgary Man Killed On Main Highway

By Passing Car

A fatal auto accident happened just west of town last Sunday night as a result of which Mr. A. A. Smith of Calgary lost his life. The circumstances surrounding the case are very sad and strange.

Mr. and Mrs. Smith were motoring from Calgary to visit Mrs. Smith's brother, Mr. R. McKnight and Mrs. McKnight who live on a farm a few miles north-west of town. Just west of Bowell the Smith car went into the ditch and Mr. and Mrs. Smith got a ride to Redcliff with a passing car. Arriving here Mrs. Smith took a room at the hotel for the night and Mr. Smith started to walk to the McKnight farm, intending to get his car out of the ditch next morning and return here for his Smith.

When a short distance west of town, a car, driven by G. W. May, of Calgary, and going west, passing Mr. Smith on the main highway hit him and knocked him unconscious. Dr. Ward was called to the scene and removed Smith to the hospital where he died shortly after.

An inquest was held Monday afternoon but was adjourned for a week in order to get further evidence.

The funeral took place in Redcliff yesterday afternoon and the remains were interred in Redcliff cemetery.

Public Market Opened Up in Medicine Hat

Will Be Operated by Mr. Joseph Freedman

Something new for Medicine Hat was presented last week when the "Public Market" was opened for service by Joseph Freedman who at one time was in business in this town.

The store next to Dreamland Theatre has undergone considerable change in order to accommodate the new enterprise. The whole scheme has been created and planned by Mr. Freedman himself. At this Public Market Shoppers will be able to purchase groceries, fruits and vegetables, fish and flowers.

The grocery and fruit section will be operated by Mr. and Mrs. Freedman and the fish department by W. Wetton who has moved his fish market from Third St. into this stand.

The store has been renovated throughout and now presents a bright tidy appearance. ***

Romantic New Film Comedy Stars Colbert

"The Gilded Lily" the new Claudette Colbert starring vehicle which opens Monday to the Monette Theatre, is a little and frothy comedy that boasts a totally new and unconventional approach on the romantic angle.

Assisted by Fred MacMurray and Ray Milland in the principal supporting roles, Miss Colbert is cast in a pretty stunner, a ringer who is dead set against marrying a millionaire. Her idea of conjugal bliss is a husband who is poor and struggling, someone whose kind she can share.

To Observe Silver Jubilee For The King

Good Program Arranged For May the 6th

Details are now fairly well lined up for the King's Diamond Jubilee celebration to be held here on Monday, May 6th.

On Tuesday evening, several committees reported showing great progress had been made in arranging for the program.

Present plans are that the program will commence at 10 o'clock in the morning on the school grounds where a full list of athletic events for school pupils and all children will take place for which prizes will be given.

At 1:30 in the afternoon a procession will be formed at the corner of Broadway and third street and after marching around town will finish at the school grounds where the afternoon's program will be carried out. All are asked to take part in the procession and to help make it as attractive as possible. Prize will be given for the best decorated floats for cars, bicycles etc. and also for the best costumes and specialty stunts in the parade.

Arriving at the school grounds the flag will be unfurled under the direction of Capt. Osgood to the accompaniment of the National Anthem. Arrangements are under way for a massed choir to lead the singing of patriotic songs. Short addresses will be given after which the school pupils will give a demonstration of human pyramid building, pageants, comic athletic games and other amusing stunts, under the direction of Mr. King and the teaching staff.

During the day's proceedings the children will be treated to refreshments and each child on the grounds will be presented with a souvenir mug, suitably inscribed for the occasion.

Judging from the enthusiasm shown by the various committees it now looks as though the only things necessary to make the day a great success is for the whole hearted co-operation of the citizen generally, and good weather.

There will be a meeting of the executive in the armory next Tuesday evening at 8 o'clock a full attendance is urgently desired.

It has been announced from Ottawa that Monday, May 6th will be proclaimed a public holiday throughout Canada as "Jubilee day" in celebration of the 25th anniversary of the coronation of King George.

Idea of conjugal bliss is a husband who is poor and struggling, someone whose kind she can share. She thinks she has found the man of her dreams, but when he turns out to be a wealthy English nobleman, she is incognito in the United States and drops him in a hurry. The resulting publicity spurs her into the insight, she is a pretty stunner, a ringer who is dead set against marrying a millionaire. Her idea of conjugal bliss is a husband who is poor and struggling, someone whose kind she can share.

Seeking Air Records

Great Britain Aiming For Long Distance And Altitude

When new records are set, Great Britain will not be far behind. At least, she will try, and, judging by recent happenings, will likely succeed.

The latest records on which the British have turned their guns are the long-distance and altitude records. It has just been announced by an official of the Air Ministry that a stratosphere aeroplane and another machine designed specially to attain the long-distance record are to be built in connection with the experiments authorized by the Air Ministry. It is expected that when the two machines are complete attempts will be made on the long-distance and altitude records.

The present long-distance flight record is held by the French pilot Coudo and Hoot, who in August, 1933, flew 5,607 miles from New York to Syria. The altitude record is held by the British pilot Donkai, who in April, 1934, ascended 47,772 feet, or nearly 9 miles. The stratosphere begins at a height of 10 kilometers, or 6.2 miles, above the earth. The new stratosphere machine, it is hoped, will be capable of climbing to a height of more than 50,000 feet. The long-distance machine is being built with a view to making the absolute range non-stop of the modern aeroplane, and it is hoped that it will reveal that a military machine can be constructed with sufficient range to reach any part of the Empire without alighting on foreign soil.—St. Thomas Times-Journal.

Shows Upward Tendency

Milk Production In Canada Is Steadily Increasing

Total milk production in Canada, says "The Agricultural Bulletin and Outlook," just published by the Dominion Department of Agriculture in co-operation with the Department of Trade and Commerce, continues to show an upward tendency which has been due almost entirely to the greater number of cows being milked. It is likely that this trend will continue during 1935. Cheese production continues to decline steadily, with milk being diverted mainly to the manufacture of creamery butter and to fluid milk market, due to more remunerative returns from these sources. Prices for cheese have been lower both on the Overseas and Canadian markets during the past season, while better prices on the Overseas market have improved during the past two years.

Creamery butter production has been related to such an extent that storage stocks are considerably higher than in the previous year. These high storage stocks will tend to keep butter prices at a lower and more uniform level during the early months of 1935 than in the past season. Some of the surplus stocks are exported. If no export movement takes place, a small carry-over in butter stock is not unlikely, with a consequent depression in butter prices which may cause a diversion of milk into cheese manufacture.

Increased production of fluid milk in dairy countries and in Canada does not point to any marked improvement in returns for dairy products. However, a great improvement in pasture conditions in 1935, with a consequent increase in butter production, would probably lower Canadian prices in better. Canadian dairymen, however, can improve their economic position by a careful culling of unprofitable cows and better herd management in breeding and feeding operations to increase the average production per cow.

Sixty Million Year Ago

Pigs Used To Grow In Saskatchewan States Dwindled

Pigs used to grow in Saskatchewan, but that was at least 60,000,000 years ago. Professor H. H. R. Wood, of the department of geology at the University of Saskatchewan, says that the remains of a pig, resembling some fossils collected in the Blaine district, west of Shaunassan, last summer.

The pig is one of the older single species (flowering plants) and these remains came from just over the minimum age of deposit in the older deposits than the Saskatchewan coal beds. What is found is not the actual pig itself, but a cast of the leg made when material flowed in to replace the rotted fur. The lines on the cast are the same as on present day pig.

The Egyptian, long before Biblical times, divided the day into 24 parts.

Think twice before you speak, or better still, keep on thinking.

This cheery-faced Scout is doing his share in the annual Scout old clothing drive at Toronto. The year 3,000 Scouts in one day gathered 180,000 articles of clothing, besides many thousand pairs of shoes, for distribution to the poor. It is Toronto's biggest welfare effort.

As It Used To Be

Learning Printing News Years Ago Was Some Job

Starting at a printer's devil on a weekly newspaper! Ah, there's the life! Hours were from 6.30 in the morning during the season when first and to be it until 6 in the evening, with the exception of Wednesday night when we printed the paper.

There was more. When union bills were printed we used to go about and take time up to the last office. In the bar rooms (it), in the hotel bars and every tavern (it). Price was \$1.50 for 50 quarter sheets, and that figure included our valuable services. When some covered 90 bills and paid for them we were fairly certain of getting paid that week, for the \$1.50 would settle our pay envelope.

Then we swept the office floor, picked the Dutch lawyer out of the cracks, washed the rollers on the press, delivered the paper all over town, ran down to the hotel at the corner and told the foreman when the boss was coming down the street ahead of time in the morning, and the Dutch lawyer out of the lamp chimney and learned how to dump a stick of dry type without making too much noise. On Friday morning we put the lawn at the town's house, fed the cat there when he and his wife were out of town for a day. In the winter time shovelled the house now and out the wood and generally helped out the car. Later, we got into the habit of taking packing boxes from the back of the store next door, also places from fences; found that the wood which elegant subscribers delivered to settle accounts was never good wood the trees from which it was taken were filled with great knots. There was a training what was a training.—Stratford News-Mirror.

New Insurance Problem

Claims Received In Kansas For Dust Damage To Motors

Prevailing dust storms have presented insurance companies in Kansas a knotty problem. They are beginning to question them.

One auto owner in the state has filed suit against his insurer, claiming that within a few hours of driving, his new car was ruined by dust storms and bearings are badly worn.

Insurance companies have taken the position that the owner is responsible for the damage and that the dust storms are not liabilities covered by the policies.

Missed Telephone Operator

Mrs. Josephine Enover, totally blind, operates a "pay telephone" switchboard in the office of the Society of the Blind in Cleveland, Ohio. She uses a Braille typewriter to take down all messages which are later transmitted on a regular machine.

In England last year there were 30,000,000 more weeks of work than in 1932.

Using Electric Rays

Australian Trying To Reduce Insects On Beaches

Although stark froshpang, among Australia's auring beaches have been reduced to less than one a year and sharks have ceased to be a serious nuisance, a movement for still greater safety continues. Experiments are being conducted at Sydney with a high frequency electric ray projected from cylinders 8 feet in diameter and placed 80 feet apart. The impulses sent out, covering the area between each cylinder, have no effect on human beings but would paralyze a cold blooded creature such as the shark. Marking the zone of the rays, a shark would immediately be unable to move and would float to the surface on the farther side of the ray "barrier".

New System Radio Control

Demonstration Given By United States Army Signal Corps

The signal corps of the United States army demonstrated a new system of wireless telegraphy that gives instant radio control of the entire strategic territory of Alaska. The whistling, clicking instruments, in a test performed for Maj. Gen. Paul H. Malone, turned messages at 300-400 words a minute, for thousands of miles, from Seattle to San Francisco, most notably at Point Barrow, most northerly settlement of the United States.

Cannot Ignore Japan

Genoa—Japan's existence as a world power and especially her preponderant position in eastern Asia cannot be ignored by the League of Nations, the Japanese ambassador at Geneva, said in a statement, authorized by the Tokyo government, was made in connection with Japan's resignation from the league, which became effective March 27.

A new steamer plying on the British Channel is controlled by pushing a button, instead of the usual method of manipulating a wheel.

Father Chooses the Delaware Again.

Donahy in the Cleveland Plain-Dealer.

Snow-Mould Turf Injury

Fungus Found To Be Most Important Cause Of Winter Killings Of Grass

Many different theories as to the cause of winter injury of turf have been advanced, such as loss of nourishment by frost; unfavorable soil conditions, for instance, lack of proper drainage or of soil nutrient sufficiency due to formation of an ice sheet on the turf; rupturing of the individual plant cells by the formation of ice crystals within tissues of various chemical and fertilizer, especially late in the season; and parasite attack by fungi or moulds. Thus in each case one or several factors may operate to cause winter injury. Hence, control must depend on a knowledge of the cause. During the last four years, the Dominion Laboratory of Plant Pathology at Edmonton, Alberta, has found that the most important cause of winter turf injury is a fungus parasite, called snow-mould. The first symptoms appear as soon as the snow melts in the spring. The fungus may be seen growing into and through the moss or ice over the turf, from dead areas of turf of various sizes and shapes appear. The mould attacks the plants, killing the leaves, stems, roots and crowns of the grass.

Control of snow-mould has been attempted in different ways with varying degrees of success. Adequate surface drainage may reduce the damage, but seldom controls it. Obviously the use of resistant varieties of grass would be the ideal control, but such varieties are not available. Early breaking of the turf and removal of snow is sometimes helpful, but it is not sufficient. Therefore, the only alternative is the careful use of chemical fungicides for killing the parasite.

The most promising method found by the Dominion laboratory is the use of a treatment which can be applied the previous fall, and which will serve to protect the turf during the late fall, winter, and spring. This treatment is to mix three ounces of carbolic acid with one ounce of corrosive sublimate for every 1,000 square feet of turf surface in an eight-quart bucket about three-quarters full of dry sharp sand. This can be thoroughly mixed with a larger quantity of dry sand and then spread or compost to facilitate even distribution over the turf.

When the snow melts, the material and very poisonous, necessary precautions should be exercised.

For Packing Poultry

Moist Temperature Should Be Around 35 Degrees Fahrenheit

Drained poultry should not be packed in rooms in which the temperature is higher than 40 degrees Fahrenheit, and in any case the birds should remain in the packing room as short a time as possible. If room temperatures of 25 to 40 degrees Fahrenheit, the atmosphere should have a relative humidity below 60 degrees. However, the golden rule is that birds should be packed at the temperature at which they are pre-cooled. This pre-cooling process is best carried out at 30 to 35 degrees Fahrenheit, as it is the lowest temperature that can be employed without freezing, but in actual practice packing in that temperature is somewhat uncomfortable for the graders and packers. At the same time, too high temperatures are to be avoided for two reasons, one, if the birds are held very long in the packing room they warm up and to that extent the advantage of pre-cooling is lost; and two, the moisture in the warm packing room condenses on the cold birds, resulting in ideal conditions for the growth of moulds and bacteria on the surface.

Reason Is Not Known

English Postman Hears Lark Of Trouble With Dogs

Why do dogs digle postmen? The question was asked by a judge during the hearing of an action in the King's bench division in which he awarded \$2,150 to a woman who said that as a result of a dog bite she was crippled for life.

A postman gave evidence that the "lark" of his dog every time he went near it, and it was to him that the judge's question was addressed.

"Name people say their dogs don't like our uniform," the postman replied, "and there say their dogs don't like our letter-bags; I don't know which is true—but we do have a lot of trouble with dogs."

Our words mean and mouth both come from the Sanskrit root man, meaning to measure.

Balmoral Is Charming

Queen Mary Has Improved Gardens Of Highland Home

One of Queen Victoria's black marks against her eldest son, afterwards King Edward, was his ill-considered dislike of Balmoral Castle as a residence. It was a great gratification to the Queen when her two grandsons, the Duke of Clarence and Prince George, did not share their father's dislike of the Balmoral home, but were delighted when they were invited to their grandmother's Scottish seat.

Prince George is now King George V., and he has never lost his affection for Balmoral. It is now nearly forty years since he landed his first salmon from the Der, and not many years have he missed since then without a visit to his Scottish residence.

When Queen Victoria used to travel North she was always rather nervous, and insisted on a speed limit of 25 miles an hour. The "safety" placed every half mile along the railway line from London to Balmoral, these "safety" first precautions cost over £4,000, but allowances must be made for the period and also for the fact that the Queen was a girl before railways were even known.

Queen Victoria was no great lover of games and those at Balmoral in her time were given the greatest attention and care which they enjoy now. Queen Mary some years ago began the work of garden at Balmoral, and the King's sister, the Queen of Norway, it is now easily the finest garden in Scotland.

The planting of trees has been a tradition at Balmoral. The Royal family at Balmoral the practice has been given full play. There is a long list of trees there, everyone of which has been planted by a member of the Royal family.

All the other trees in the "Royal manor" are the work of the Queen. The Queen Victoria during the past 60 of 70 years, and the nomenclature with their dates, which are affixed to the trunk, make most interesting reading.

The Kaiser and all his family have their trees at Balmoral, and although an anti-German party removed the main-plants during the war they have since been replaced. The German Emperor had always a great love for Balmoral, although he never visited it. The British Sovereign led there. The hillsides plain, with the Royal party all happily reclining on the grass and eating of the strawberries, could never be understood by the proud and self-important German ruler.

A Great Opportunity

People Who Talk Work Seriously Will Make Money

Do you realize that your job is the most important affair in the world, just as it is in the life of a man? The way you look at your job makes all the difference to your career. Do you regard it only as a money-making thing? Or do you consider it a position to be proud of?

Your job is life's gift. An opportunity for you to show what it is. An opportunity to do a piece of work better than it was ever done before. It does not matter in the least what kind of work you do. Whether you use a hammer, spade, or pen, it is up to you to use that hammer, pen or spade in a more masterly way than anyone at first possible.

If you put your heart and soul into your office you are bound to make good and will wake up one fine morning to discover that you are one of the independent. The world respects you because it cannot get along without you.

The humblest task is not unworthy for a worthy man. Geoffrey Rhodes.

Much Less Reform

Anticipation of a big loss within a week of an arm, because with artificial legs many persons walk remarkably well, whereas the latest mechanical hand is only a clumsy imitation," writes J. C. Farnes, orthopedic instructor, in a new book, "Thanks for the Limbs."

Although Indians of Mexico had gold jewelry, this metal was almost unknown to prehistoric Indians of Canada, the United States and Alaska.

Quaternary cosmologists becoming an air base at a cost of \$100,000.

The local legislature prorogued last Thursday. It was anticipated the election would be held towards the end of June.

Redcliff Boy Scouts made a splendid showing at the Jamboree in Calgary last Monday. Twenty boys from here took a special train in the morning and they presented a real smart appearance in their new uniforms. All report a most enjoyable outing.

Stampede Association
Elect New Officers

Will Hold Celebration Here On Dominion Day

The annual meeting of the local Stampede Association was held last Friday evening when a new set of officers was elected as follows:

President — H. M. Sangster
Vice Pres. — J. Podesta
Sec. Treas. — W. H. Dacre
Ex. Com. — M. Rindahl, W. T. T. Balmer, L. R. Stone, N. Dickson, J. Dacre, G. Thomson.
The matter of selecting a treasurer and a manager was left to the officers.
The newly elected officers will commence at once to make arrangements for the annual stampede to be held on July 1st.

This is Wm. Rogers' week, hence laugh week. The latest in spotted comedy, "Life Begins at 40," at the Monarch Theatre as the feature attraction, and with a mirth provoking situation presented once more, that "Will Rogers the maestro of laughter."

It is a funny bone breaker. While writing this review, we were to hold back chuckles at some in recollecting the antics of his mellow life-loving country editor, played by Rogers, who set out to prove it at the last years of life before forty. Rogers gives romance a clean track, turns horrid war scenes into hill bills, fights a pistol duel and exchanges a wiper load, produces a tornado or blizzard, and accidentally utters a batch of quaint and homespun philosophy.
